THE SOCIETY OF THE CINCINNATI (1783)

“To perpetuate therefore, as well the remembrance of this vast event, as the mutual friendships which have been formed under the pressure of common danger, and in many instances cemented by the blood of the parties...”

The American Revolution...

- ★ secured our national independence,
- ★ established our republic,
- ★ created our national identity,
- ★ and articulated our highest ideals—liberty, equality, civic responsibility and natural and civil rights.

THE LEGACY OF CRISPUS ATTUCKS

The road to American independence was paved by many heroes. In this lesson, students explore the themes of independence and legacy through a case study.

CRISPUS ATTUCKS

AMERICAN "NOTIONS OF INDEPENDENCE"

The Enlightenment ideals expressed in the *Declaration of Independence* directly influenced the actions of the citizens and soldiers of colonial America. In this lesson students analyze primary sources to discover how the *Declaration of Independence's* argument for liberty and independence was articulated and reflected throughout the newly independent states, and how those ideals continue to shape our nation today.

George Washington's Vision for the United States

During their winter encampment two years after the storied American victory at Yorktown, General Washington's officers found their patience with Congress wearing dangerously thin. By the ides of March, as they awaited a formal end to the War and for financial promises to the military to be honored, their frustration threatened to overtake their allegiance to America's new civilian government. Their passions were heroically reined in by George Washington wielding two unexpected weapons—his unfailing integrity and his new reading glasses. This lesson explores the events at Newburgh and how George Washington's vision for the United States and the ideals of republican sacrifice and civic virtue triumphed during a crisis that could have fundamentally altered the American experiment.

The Legacy of America's First Veterans

This lesson invites students to examine and interpret primary sources documenting the lives of Revolutionary War veterans and illustrating the public debate over veterans' pension between 1818 and 1832, which resulted in the adoption of the first pensions awarded for military service without regard to disability or financial need. The development of military pensions as an expression of gratitude for service rather than a form of poor relief reflected and shaped the emergence of democratic culture, focused on the interests of ordinary people and honoring them for service to the nation.

The Legacy of the American Revolution for Women's Rights

This lesson invites students to explore the contributions of women to the fight for American independence and the importance of the high ideals articulated by the revolutionaries—especially universal equality and natural and civil rights, for the long struggle for women's suffrage—which culminated in the ratification of the Nineteenth Amendment to the Federal Constitution in 1920.

WOMEN'S RIGHTS

Why has she not claimed all those rights, long ago guaranteed by our own declaration to all the citizens of this Republic? . . . Can woman be said to have a right to **life**, if all means of self-protection are denied her—if, in case of life and death, she is not only denied the right of trial by a jury of her own peers, but has no voice in the choice of judge or juror, her consent has never been given to the criminal code by which she is judged? Can she be said to have a right to **liberty**, when another citizen may have the legal custody of her person; the right to shut her up and administer moderate chastisement; to decide when and how she shall live, and what are the necessary means for her support? Can any citizen be said to have a right to the **pursuit of happiness**, whose inalienable rights are denied; who is disenfranchised from all the privileges of citizenship; whose person is subject to the control and absolute will of another? . . . ‘Governments derive their just powers from the consent of the governed.’ ‘Taxation and representation are inseparable.’ These glorious truths were uttered for some higher purpose than to decorate holiday flags, or furnish texts for Fourth of July orations . . .

International Political and Social Reform and the American Revolution

HOME / LESSON PLANS / THE REVOLUTIONARY WORLD / INTERNATIONAL POLITICAL AND SOCIAL REFORM AND THE AMERICAN REVOLUTION

In 1789, America was still putting the finishing touches on its new republic when contemporaries in France called for their own revolution, evoking many of the republican ideals, Classical heroes and Enlightenment thinkers admired by America's revolutionary generation. *Le tableau moral raisonné des symboles de la république : fondateurs de la liberté : martyrs de la liberté*, an engraving created in 1794 as a visual guide to educate "children of freedom" about France's path to republican government, includes a nod to American "founders of liberty" George Washington and Benjamin Franklin—underscoring the kindred nature of the French and American struggles to free their nations from the bonds of European monarchy. This lesson explores how late eighteenth century America's newly enshrined ideals, heroes and influences—and the American Revolution itself—have inspired political and social reform movements around the world for over two hundred years.

George Washington subscribed (literally and figuratively) to the aims of the Society of the Cincinnati as they were outlined in its Institution, and he was president general from its inception until his death. Those aims, which were Washington's aims as well as the aims of the Society, included perpetuating the fellowship of the officers of the Continental Army and Navy, perpetuating the memory of the achievement of American independence, and advocating for justice to be done for veteran officers.

These collection items were selected for a workshop with teachers participating in the first virtual George Washington Teacher Institute "George Washington: From Soldier to Commander in Chief" with scholar Sarah Purcell.

The Critical Time After Yorktown
William M. Fowler, Jr.
 Professor of History, Northeastern University

Many people assume that the Revolutionary War ended with the surrender of the British army at Yorktown in October 1781. In fact, the war continued for two more traumatic years. During that time, the Revolution came as close to being lost as any time in the preceding six years. When Congress failed to pay the army, rumors of mutiny roiled through the ranks, culminating in George Washington's legendary address to his officers in Newburgh, New York, on March 15, 1783. Professor Fowler chronicles the events of the last two years of the war and discusses how Washington saved the republic.

Why the American Revolution Matters

Posted February 18, 2019 / Basic Principles, History Education, The Legacy of the Revolution

The American Revolution was shaped by high principles and low ones, by imperial politics, dynastic rivalries, ambition, greed, personal loyalties, patriotism, demographic growth, social and economic changes, cultural developments, British intransigence, and American anxieties. It was shaped by conflicting interests between Britain and America, between regions within America, between families and

“The revolutionary generation did not complete the work of creating a truly free society, which requires overcoming layers of social injustice, exploitation, and other forms of institutionalized oppression that have accumulated over many centuries, as well as eliminating the ignorance, bigotry, and greed that support them. One of the fundamental challenges of a political order based on principles of universal right is that it empowers ignorant, bigoted, callous, selfish, and greedy people in the same way it empowers the wise and virtuous. For this reason, political progress in free societies can be painfully, frustratingly slow, with periods of energetic change interspersed with periods of inaction or even retreat. The wisest of our Revolutionaries understood this, and anticipated that creating a truly free society would take many generations. The flaw lies not in our Revolutionary beginnings or our Revolutionary ideals, but in human nature. Perseverance alone is the answer.”
